About Me

I'm a **MERN Stack Web Developer** with great designing skills and problem solving skills. With a track record of developing impressive websites and successfully solving over 1000+ competitive problems on platforms like Codechef, LeetCode, and Codeforces, I have honed my skills and gained valuable experience over the years. I'm a collaborative team player who is quick to adapt, change, and contribute to a pleasant work atmosphere. Aside from work, I'm an enthusiastic sports fan, with a particular interest for cricket and various esports games such as BGMI

Experience

Software Developer and Team Lead

Zero to Zee

Feb, 2023 - Present

- As an intern, I significantly contributed to the development and refining of the chrome extensions Prime Sender and Mobbana, which currently have over 55,000 active users.
- In addition to coding and development, I manage a team of four developers, working to improve teamwork and overall team productivity.
- Furthermore, I effectively interacted with clients from all over the world, answering their concerns and resolving issues as quickly as possible.

Projects

WeatherSite

A stylish and user-friendly website offering up-to-date weather information and a 48-hour forecast for any city. With dynamic backgrounds reflecting the current weather, it utilizes React and Material UI for a seamless and visually appealing experience.

SuperSnake

An engaging and addictive snake game where players can control the snake's movement using their mouse or touchpad.

NoteSnap

A Chrome Extension for effortless note-taking on any website. Highlight, save, and manage important details.

MySite

A portfolio website presenting my achievements, skills, and projects with a visually appealing design and responsive interface.
